

## Dynamic Engineering Australia

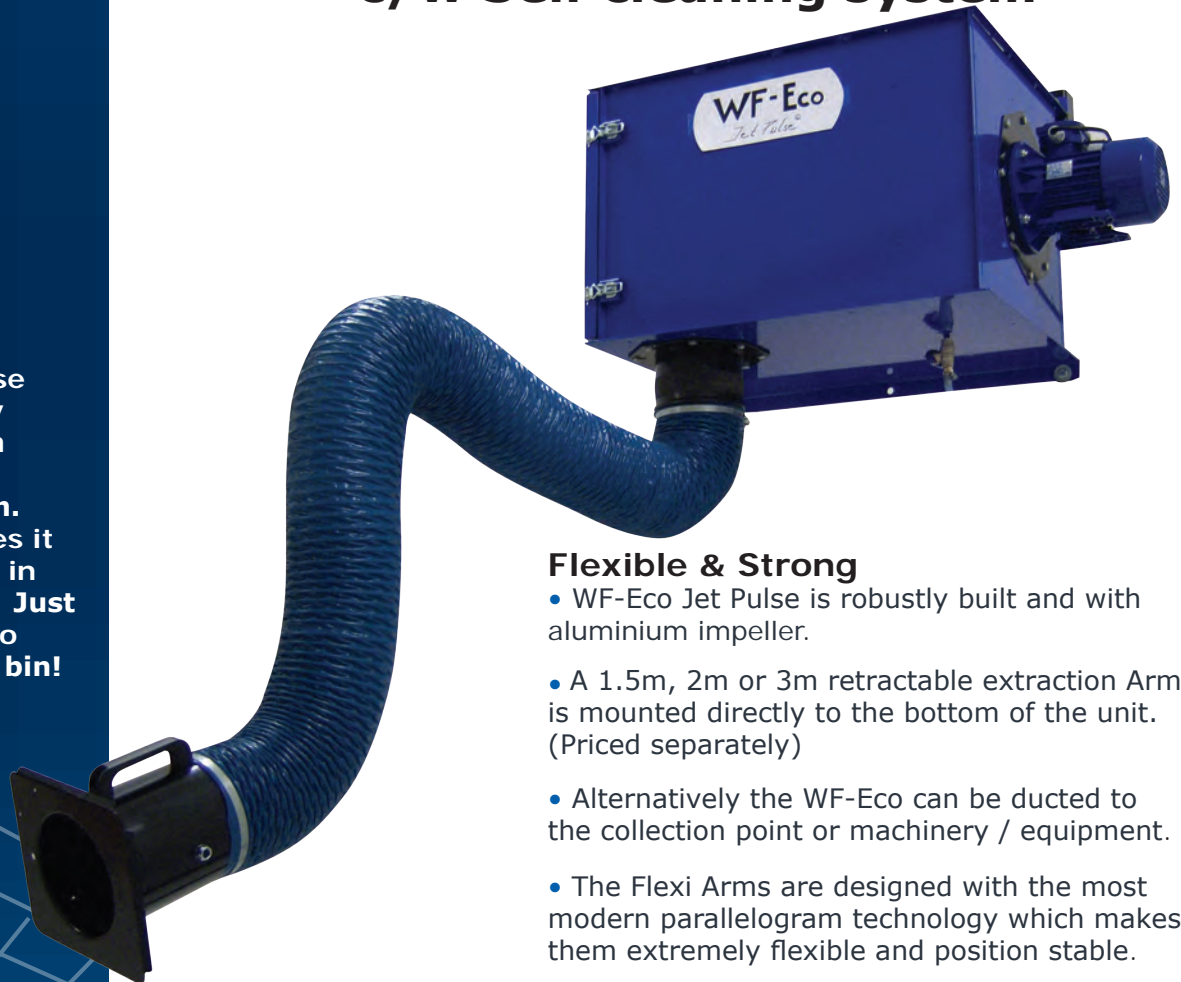

# WF-Eco Wall mounted filtered fume extraction unit c/w Self cleaning system

### JET PULSE CLEANING

WF-Eco Jet Pulse filter has a very efficient built in compressed air cleaning system. In a few minutes it cleans the built in filter cartridge. Just open the door to empty the dust bin!

### ECONOMICAL & EASY TO MOUNT

Mount the WF-Eco Jet Pulse Filter on the wall and attach it to electricity and compressed air. Connect a Flexi Extraction Arm directly to the filter and it's ready to use.

### Flexible & Strong

- WF-Eco Jet Pulse is robustly built and with aluminium impeller.
- A 1.5m, 2m or 3m retractable extraction Arm is mounted directly to the bottom of the unit. (Priced separately)
- Alternatively the WF-Eco can be ducted to the collection point or machinery / equipment.
- The Flexi Arms are designed with the most modern parallelogram technology which makes them extremely flexible and position stable.

### Welding Fume & Dust Filter

- The most efficient and economical solution for welding smoke and dust extraction, over 1000m<sup>3</sup>/h through the hood and with aluminium impeller.

### Product List

WF-Eco Jet Pulse Wall-filter 1-Phase,0,75kW, 240 Volt, 50Hz. Extraction arm not included	P-549
WF-Eco Jet Pulse Wall-filter 3-Phase,0,75kW, 415 Volt, 50Hz. Extraction arm not included	P-547
Alfi IS retractable extraction arm 2m. Hanging	P-052
Alfi IS retractable extraction arm 3m. Hanging	P-053
Replacement filter cartridge, Polyester	P-541
HEPA filter adapter. Needed for mounting HEPA filter on top of unit	P-553
HEPA filter 23m <sup>2</sup>	P-554
