

MF-Grinder with Jet-Pulse Filter Cartridge Cleaning

Complete Welding/Grinding Booth - Ready to use!

MF-Grinder is a complete working booth. Just plug it in and start welding, or grinding. It is a working booth with side walls and 6mm heavy duty steel table (900x600mm) and built in down draft grid which exhausts 2000m³/h. The fume or dust is filtered and recycled. For extra convenience, the filter cartridge is equipped with a Jet-Pulse pneumatic cleaning system.

Combined Water Filter and Spark Trap

MF-Grinder is equipped with an expansion chamber and two water filters that filter away the larger particles and, in a safe way, take care of sparks!

Filter Cartridge with Jet-Pulse Cleaning

The filter cartridge inside the MF-Grinder is efficiently cleaned by the built in Jet-Pulse pneumatic cleaning system.

Legs or Wheels

MF-Grinder is equipped with either 125mm legs or with wheels so the MF-Grinder can easily be moved around to where it is best needed.

Accessories

- Lights
- Electrical Outlet
- Welding Gun Holder
- Earth Connection

30 YEARS EXPERIENCE!

30 years experience in design and manufacturing at your service.

The ALFI products are a combination of well-proven technique and progressive new ideas.
