cleaning stations

safe personnel cleaning

DANGER - Compressed air can be fatal

Dynamic Engineering's "JetBlack" cleaning station is the **safe** alternative.

CHALLENGE

Misuse of compressed air can have tragic consequences – if used on exposed skin it can cause serious injury or even death.

The challenge is to safely, effectively clean and de-dust personnel and equipment at low operating cost.

SOLUTION

Dynamic Engineering's multi-staged blower fitted to the "JetBlack" cleaning station is the ideal solution for safely cleaning and de-dusting personnel and equipment.

SATISFACTION

The "JetBlack" cleaning station provides safe, effective and long-term satisfaction.

SAFE

Being a multi-staged blower and delivering a high air volume at low pressure, the JetBlack cleaning station is entirely safe to use even when directed at areas of exposed skin. Thanks to the JetBlack's optional replaceable filter, the supply air can also be cleaned clean.

EASY-TO-USE

Simple on/off operation. Minimises transfer of dust from work environment to vehicles and homes.

EFFECTIVE

It enables personnel to avoid accumulation of dust paper fibres, grit, etc. on their clothes and helps prevent dust from being transferred between departments, workstations and or into canteens.

COST EFFICIENT

Blower powered lower operating costs than compressed air*

* Compressed air should never be used for personnel de-dusting for safety reasons - but it happens!

REDUCED NOISE LEVELS

78dB(A) - promote a better working environment.

Available as easy to install wall-mounted or transportable units.

Dynamic Engineering JetBlack Models

Wall Mounted Cleaning Stations

- Ideal for entry / exit points of factory floors, canteens, changing room areas etc.
- Touch button for on/off operation.
- 240V, 50Hz units readily available.
- 1.5m hose length.
- Optional extras include motor filters for extremely dusty environments.
- Robust, rugged design—constructed from high grade plastics.

Portable Jetblack Units

- Speed controllable airflow.
- Extra long hose supplied, 2.5m in length.
- 240V, 50Hz unit readily available.
- Optional extras include footswitches and lances.
- Carrying handle supplied (weighs less than 16lbs).
- Anti static version available - designed to remove static charges /dust from product surfaces. Ionisation
- provided by titanium emitters located in the nozzle of the gun,
- powered by a high voltage DC source.
