

Technical data sheet**HOSE REELS****ARHV**

Manual rewind hose reel and on-board fan. Suitable for 180°C

**APPLICATIONS**

Localised extraction of exhaust gases from motorbikes, cars, trucks and heavy vehicles.
Wall-mounted or ceiling-mounted in centralised system or with single on-board fan.

FEATURES

An innovative and exclusive rotation system made from “rotamax” aluminium alloy, designed to permit glide and manoeuvrability in the time and conditions of use, even heavy-duty.
Containment guard with greaser for harmonic stainless steel springs, preloaded and pre-calibrated according to the lengths and diameters of the flexible hoses.
Standard structure in reinforced steel for all versions.
Disks and drums are available in 4 different sizes to meet any possible requirements for anti-crush hose diameter and length.
Possible interchanging of solutions and accessories to improve extraction with our EV extraction fans and motorized calibration damper system.
Crush-resistant hose TGA with lengths and diameters available from 75 mm to 150 mm.

ACCESSORIES

QUICK COUPLERS

For nozzle release, in impact and temperature resistant plastic

NOZZLES

A complete range for different types of mufflers

KIT AS-CAR

For twin exhaust cars consisting of 2 rubber nozzles, flex hose and "Y" fitting

KIT START-STOP

Complete with micro switch wired to the junction box for automatic start up and shut down of the extraction fan

HOSE KIT

Galvanised sheet metal components to exhaust the extracted fumes
